## Introduction

|                                                                                                |   |
|------------------------------------------------------------------------------------------------|---|
| Table A: South African population by province and population group: 1996                       | 4 |
| Table B: South African households by province and population group of the household head: 1996 | 4 |
| Table C: South African population by province and population group: 2001                       | 5 |
| Table D: South African households by province and population group of the household head: 2001 | 5 |

## Part 1: Information on individuals

|                                                                                                            |    |
|------------------------------------------------------------------------------------------------------------|----|
| 1 First home language by population group and gender                                                       | 8  |
| 2 Country of birth by population group and gender                                                          | 13 |
| 3 Citizenship by population group and gender                                                               | 16 |
| 4 Age distribution in five-year intervals by population group and gender                                   | 19 |
| 5 Religion by population group and gender                                                                  | 24 |
| 6 Marital status amongst those aged 15 years and older by population group and gender                      | 29 |
| 7 The disabled population by type of disability, population group and gender                               | 32 |
| 8 Level of education amongst those aged 20 years or more by population group and gender                    | 35 |
| 9 Attendance at an educational institution amongst those aged 5-24 years by population group and gender    | 38 |
| 10 Labour market status of those aged 15-65 years by population group and gender                           | 51 |
| 11 Reasons for being not economically active amongst those aged 15-65 years by population group and gender | 55 |
| 12 Employment status amongst the economically active aged 15-65 years by population group and gender       | 57 |
| 13 Labour market rates amongst those aged 15-65 years by population group and gender                       | 60 |
| 14 Occupation amongst the employed aged 15-65 years by population group and gender                         | 62 |
| 15 Economic sector amongst the employed aged 15-65 years by population group and gender                    | 66 |
| 16 Individual monthly income amongst the employed aged 15-65 years by population group and gender          | 71 |

**Note:** There are four tables in each section in Parts 1 and 2. The first two show numbers and percentages respectively for 1996, and the third and fourth show numbers and percentages respectively for 2001. The exception is Section 13, which has two tables, one for 1996 and one for 2001.

The list alongside gives the generic table heading for each topic, and the page number of the first table in the set.

## Part 2: Information on households

|                                                                                                         |    |
|---------------------------------------------------------------------------------------------------------|----|
| 17 Type of dwelling by population group and gender of the household head                                | 78 |
| 18 Energy source for cooking, heating and lighting by population group and gender of the household head | 82 |
| 19 Main water supply by population group and gender of the household head                               | 87 |
| 20 Toilet facilities by population group and gender of the household head                               | 90 |
| 21 Refuse removal by population group and gender of the household head                                  | 93 |
| 22 Telephone facilities by population group and gender of the household head                            | 96 |
| 23 Age distribution in five-year intervals of the household head by population group and gender         | 99 |

## List of figures

|              |                                                                                                                                        |     |
|--------------|----------------------------------------------------------------------------------------------------------------------------------------|-----|
| Figure 1:    | Distribution of the population by first home language, Census 1996 and 2001                                                            | 8   |

# Introduction

## Contents of this publication

This series represents the first full comparative report between the results of Census '96 and Census 2001, for the country as a whole, and for each province.

This volume contains detailed tables (numbers and percentages) describing personal and household characteristics of the population of KwaZulu-Natal in 1996 and 2001 by population group and gender. The exact topics covered can be seen in the contents list. A comparative graph or graphs and commentary are provided for each topic. Those topics requiring specialist analysis, such as mortality, migration and fertility, are omitted from this report.

For certain topics direct comparisons are not possible. A clear indication is given in the text where this has occurred.

At the end of this introduction are four background tables giving an overall description of the numbers and percentages of people and households in each province in each census year, by population group and gender.

Similar reports to this one are being published for each of the provinces. Users should consult the website [www.statssa.gov.za](http://www.statssa.gov.za) for information on their availability. The national volume was published in mid-2004.

A full list of the various Census 2001 printed and electronic products can also be found on the website.

## Technical notes

### *Adjusting for undercount*

For both censuses a post-enumeration survey (PES) was undertaken to determine the degree of undercount or overcount. The numbers and percentages presented in this report have been adjusted according to the PES findings.

Adjusting the count in this way leads to the introduction of fractions. These fractions have been rounded to whole numbers. The sum of the separate numbers may therefore differ slightly from the totals given. A similar effect can be seen with the percentages, which are rounded to one decimal place, and therefore may not always sum to 100.

### *Population group*

Statistics South Africa (Stats SA) continues to classify people by population group, in order to monitor progress in moving away from the apartheid-based discrimination of the past. However membership of a population group is now based on self-perception and self-classification, not on a legal definition.

In 2001, five options were provided on the questionnaire, Black African, Coloured, Indian or Asian, White, and Other. In 1996 the first group was described as African/Black. In this volume the 2001 terminology is used. Note that for the 1996 data, 'Other' is reported separately, whereas in 2001 responses in this category were imputed. Non-responses for population group were also handled by imputation in 2001.

### *Imputation*

In 2001, imputation was used to allocate values for unavailable, unknown, incorrect or inconsistent responses in most categories. The editing system uses a combination of 'logical' imputation techniques and 'hot decks' (dynamic imputation). 'Undetermined' values were used only for a few variables in a few cases (such as industry and occupation).

Logical imputations, in which a consistent value is calculated or deduced from other information in the household, are usually preferred over hot deck imputations. Generally, the editing system attempts to resolve inconsistencies first by looking at other characteristics of the household (for example, a married person with an invalid response for sex would be assigned the opposite sex to their spouse). If this is unsuccessful, then a consistent value is imputed from a hot deck, which bases the imputation on nearby persons or households that share similar characteristics.

### *Unspecified values*

Variables with unspecified values from Census '96 are excluded from the comparative graphs, but in 2001 values were imputed for these variables, and are therefore included.

### *Coverage*

- In this volume information on households, housing and services (Section 2) is provided for people living in housing units only. Household and services information is available elsewhere for persons in collective living quarters.
- Person information (Section 1) is provided for everyone, except for Census '96 for certain topics, such as country of birth and educational achievement, as noted on the individual tables. This is because in Census '96 questions on these topics were not asked of persons in collective living quarters other than hostels.

### *Table headings*

To avoid repetition, when the entire population is being described in any table in Section 1, the heading of the table does not generally reflect this. When a subset is being described, such as the disabled population, this is given in the heading. A quick glance at the bottom right hand corner of the numbers tables will confirm the universe.

## **Definitions**

A publication containing all census concepts and definitions is available electronically (Report no. 03-02-26 (2001)). Nevertheless, for the convenience of readers, the main terms used in this volume are defined below.

- *Household:* A household is a group of persons who live together, and provide themselves jointly with food and/or other essentials for living, or a single person who lives alone.

Note: The definition of household for other Stats SA data collection operations includes the four-night-a-week rule, according to which a person is a member of a household if he spends on average four nights a week in that household. As Census '96 and 2001 were *a de facto* censuses, which means that people were counted where they were staying on census night, the four-night-a-week rule did not apply.

- *Housing unit:* A unit of accommodation for a household, which may consist of one structure, more than one structure, or part of a structure. Examples of each are a house, a group of rondavels, and a flat. (The types of living quarters classified as housing units can be seen in Table 17.)

- *Collective living quarters:* Living quarters where certain facilities are shared by groups of individuals or households. They include hostels, hotels and institutions.

Note: In Census '96 the terminology for the different types of living quarters was slightly different, but in this volume the current terminology is used in reference to both census years. See the section on coverage, above.

- *Economically active:* All those who are either employed or unemployed. The rest of the working-age population is classified as not economically active, which includes students, homemakers, those too ill to work and anyone not seeking work.

- *Unemployed:* According to the *official or strict definition*, the unemployed are those people within the economically active population who (a) did not work in the seven days prior to census night, (b) wanted to work and were available to start work within a week of census night, and (c) had taken active steps to look for work or to start some form of self-employment in the four weeks prior to census night. People who fulfil the first two criteria but not the third are classified as unemployed according to the expanded definition.

Note: Census 2001 figures are given for unemployment according to the official definition. This is not possible for Census '96, as the way the questions were phrased did not elicit accurate information about job-seeking behaviour. Census '96 figures are therefore considered to be according to the expanded definition.

- *Highest level of (completed) education:*

- No schooling: This category includes people who had never been to school, as well as children in pre-school, Grade 0, and Grade 1 at the time of the census. Only children who had **completed** Grade 1 fell into the next category.
- Some primary: Grades 1–6 inclusive.
- Complete primary: Grade 7

- Some secondary: Grades 8–11 inclusive
- Grade 12/ Std 10
- Higher: Grade 12 plus any tertiary qualification of at least six months' full-time study or equivalent.
- *Income:* All money received from salary, wages or own business; plus money benefits from employer, such as contributions to medical aid and pension funds; plus all money from other sources, such as additional work activities, remittances from family members living elsewhere, state pension or grant, other pensions or grants, income from investments, etc. The amount reported is the total before tax. Note: Income is generally under-reported.

### **Extract from the Report of the Census Sub-committee to the South African Statistics Council on Census 2001**

Preliminary investigations indicate that the 2001 census probably resulted in:

- an underestimate of the number of children below age five\*
- an over-estimate of the number of teenagers aged between 10 and 20
- an underestimate of the number of men relative to the number of women\*
- an underestimate of the number in the white population
- higher than expected numbers aged 80 and older, in the African population
- an underestimate of the number of foreign-born, since some identified themselves incorrectly as being South African-born
- age misstatement in the range 60–74
- an overestimate of the extent of unemployment
- an underestimate of those who were employed for only a few hours per week
- an underestimate of household income
- an overestimate of the number of paternal orphans and the number of fathers missing from the household.

\* This is a common feature of censuses, particularly in developing countries.

In addition:

- Scanning problems caused some births to be recorded in the wrong province. The number of cases is relatively small and should not lead to too much distortion for most purposes for which these data are used; however, it does produce obviously erroneous results in when one tries to estimate the extent of inter-provincial migration of those born since the previous census.
- The fertility data (numbers of children ever born, children surviving) are problematic.

For further details of these investigations see the full report of the *Census Sub-Committee*.

### **Symbols used in the tables**

- 0 = less than half  
 0,0% = less than 0,05%  
 - = nil or not applicable

## Background tables

**Table A: South African population by province and population group: 1996**

Please refer to the extract from the report of the Census Subcommittee to the SA Stats Council on Census 2001 (p.3) when reading this table.

## **Part 1: Information on individuals**

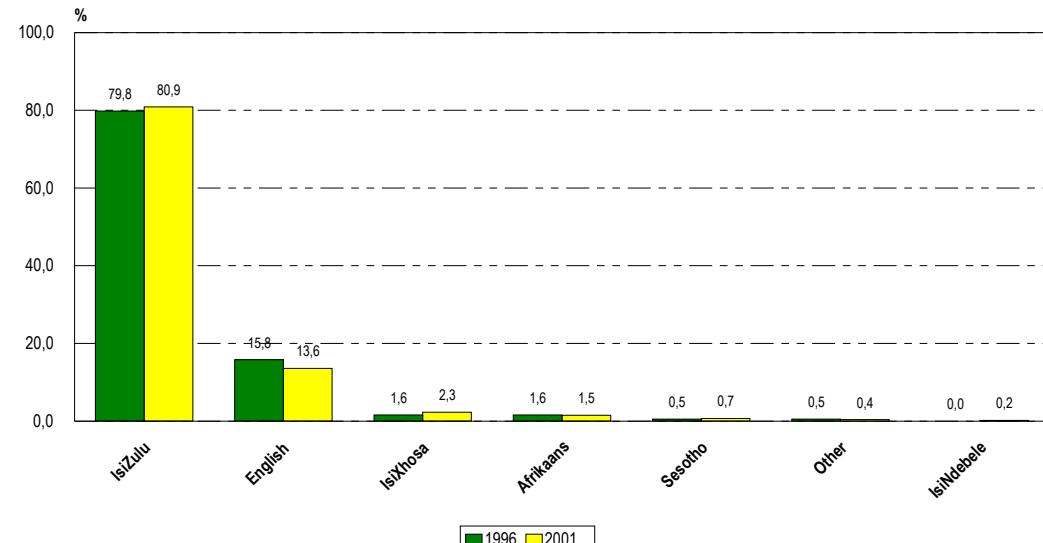

# 1 Home language

Tables 1.1 to 1.4 show the numbers and percentages of the KwaZulu-Natal population speaking each of the official languages of South Africa as their first home language (language most often spoken in the household) at the time of Census '96 and Census 2001, broken down by population group and gender.

The most frequently spoken first home language in KwaZulu-Natal in both census years was isiZulu. It was spoken by 6,7 million people in 1996, increasing to 7,6 million in 2001. This was followed by English, spoken by 1,3 million in both censuses. In 1996, the third most frequently spoken language was Afrikaans, spoken by 136 000 people, followed closely by isiXhosa (132 000). By 2001, isiXhosa was spoken by 220 000 people, making it the third most frequently spoken language.

Figure 1 shows the percentage of people speaking each home language in 1996 and 2001. More than three-quarters of the population reported isiZulu as their first home language.

**Figure 1**  
**Distribution of the population by first home language**  
**Census 1996 and 2001: KwaZulu-Natal**

Census 1996: Excluding unspecified language  
Census 2001: Imputed values for unspecified language

## 1.1 First home language by population group and gender (numbers): KwaZulu-Natal, 1996

Please refer to the extract from the report of the Census Subcommittee to the SA Stats Council on Census 2001 (p.3) when reading this table.

## 2 Country of birth

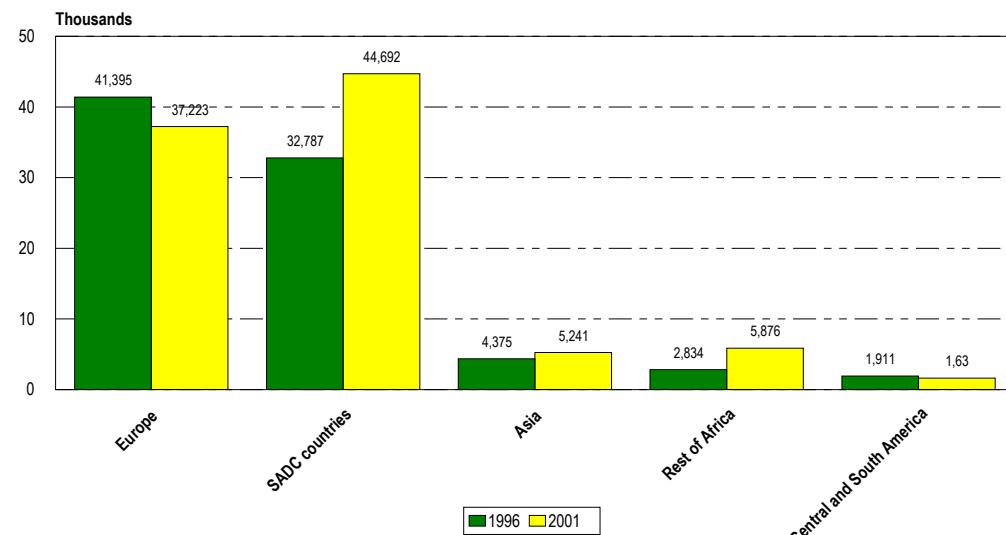

Tables 2.1 to 2.4 show numbers and percentages of the KwaZulu-Natal population born in South Africa and in other broad country groupings from Census '96 and Census 2001.

The vast majority of the population in KwaZulu-Natal, 98,6% in 1996 and 99,0% in 2001, reported that they were born in South Africa.

In 1996, the largest number among those not born in South Africa were those born in Europe (41 000), followed by those born in a Southern African Development Community (SADC) country (33 000). By 2001, these proportions had reversed with the largest number being those born in a SADC country (45 000), followed by those born in Europe (37 000).

Figure 2, which gives the data in thousands, shows clearly that the largest increase was in persons born in other SADC countries, and the next largest in persons born in other parts of Africa.

**Figure 2**  
Country of birth of those not born in South Africa  
Census 1996 and 2001: KwaZulu-Natal

Census 1996: Excluding persons in collective living quarters and unspecified country of birth  
Census 2001: Imputed values for unspecified country of birth

Please refer to the extract from the report of the Census Subcommittee to the SA Stats Council on Census 2001 (p.3) when reading this table.

### 3 Citizenship

Tables 3.1 to 3.4 show comparisons of numbers and percentages for KwaZulu-Natal between the censuses of 1996 and 2001, for broadly grouped countries of citizenship, by population group and gender.

Of the 33 000 people who said they were not South African citizens in 1996, 18 000 were citizens of European countries. By 2001, this number had dropped to 15 000, with those who said they were citizens of SADC countries increasing from 8 000 to 17 000.

## 4 Age

Tables 4.1 to 4.4 show number and percentage comparisons for KwaZulu-Natal between the censuses of 1996 and 2001, for age in five-year intervals, by population group and gender.

Over one-third of the population were children under the age of 15 years (36.1% in 1996, decreasing to 34.7% in 2001). A relatively small percentage consisted of those aged 65 years and older (4.4% in 1996 and 4.8% in 2001).

**Figure 4.1**  
Age distribution of males and females in the total population  
Census 1996: KwaZulu-Natal

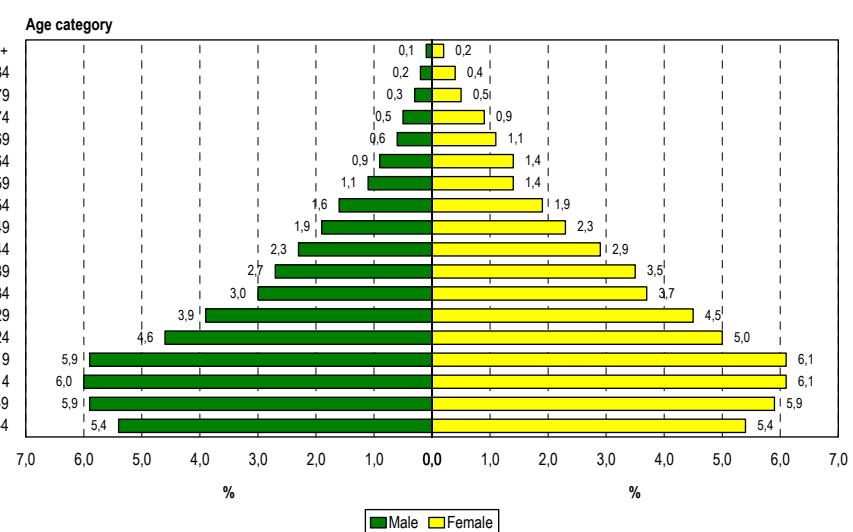

Excluding unspecified age

Figures 4.1 and 4.2 show the difference in age distribution of the KwaZulu-Natal population in five-year age intervals by gender for 1996 and 2001. In both years, 64.7% were aged 29 years or younger.

Please refer to the introduction when reading this section.

**Figure 4.2**  
Age distribution of males and females in the total population  
Census 2001: KwaZulu-Natal

Imputed values for unspecified age

Please note that in both graphs the percentages total 100% for the entire population, not for male and female separately as in the 1996 age pyramids previously published by Stats SA.

Please refer to the extract from the report of the Census Subcommittee to the SA Stats Council on Census 2001 (p.3) when reading this table.

## 5 Religion

Tables 5.1 to 5.4 show number and percentage comparisons between the censuses of 1996 and 2001, for main religious groupings by population group and gender, among those living in KwaZulu-Natal.

In 1996, approximately 5,6 million people in KwaZulu-Natal were classified as belonging to a Christian religious group of one kind or another, compared to 6,8 million in 2001.

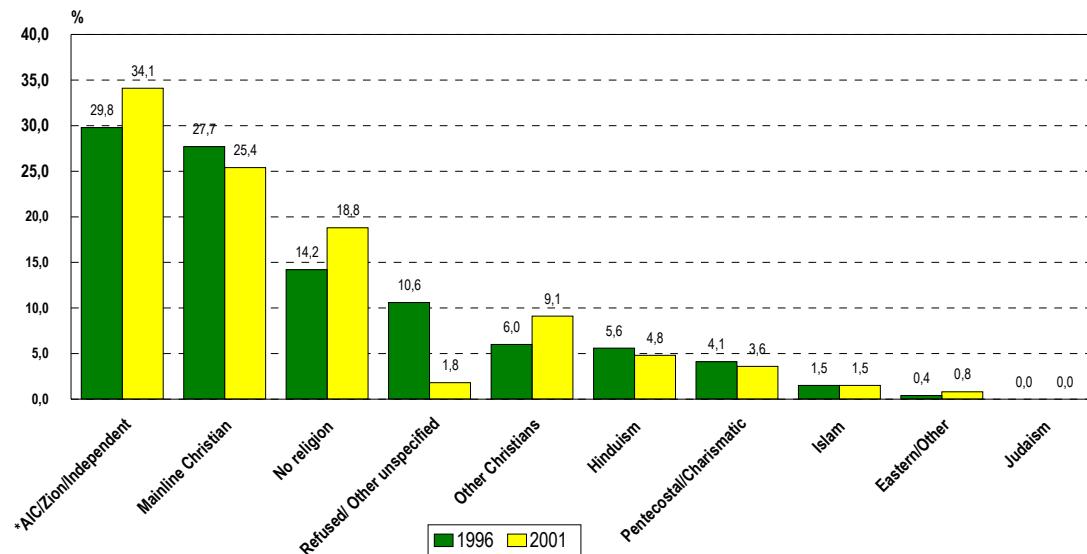

Approximately 1,2 million persons reported having no religious affiliation in 1996, compared to 1,8 million at the time of Census 2001.

Figure 5 shows broadly defined religious affiliation. In both censuses, less than a third in KwaZulu-Natal in both censuses indicated they belonged to conventional or mainline Christian churches. The mainline churches include reformed churches, Anglican, Methodist, Presbyterian, Lutheran, Roman Catholic and Orthodox churches and the United Congregational Church of South Africa.

In 2001, a further third of the population indicated that they belonged to one of the independent churches. This group includes Zionist churches, iBandla IamaNazaretha and Ethiopian-type churches.

Amongst those for whom the question was answered, 14,2% stated that they did not belong to any religious grouping at the time of Census 1996, compared to 18,8% at the time of Census 2001.

**Figure 5**  
Distribution of the population by religious affiliation  
Census 1996 and 2001: KwaZulu-Natal

\* AIC = African independent churches

Census 1996: Excluding refusals and not stated

Census 2001: Excluding refusals and not stated.

## 5.1 Religion by population group and gender (numbers): KwaZulu-Natal, 1996

Please refer to the extract from the report of the Census Subcommittee to the SA Stats Council on Census 2001 (p.3) when reading this table.

## 6 Marital status

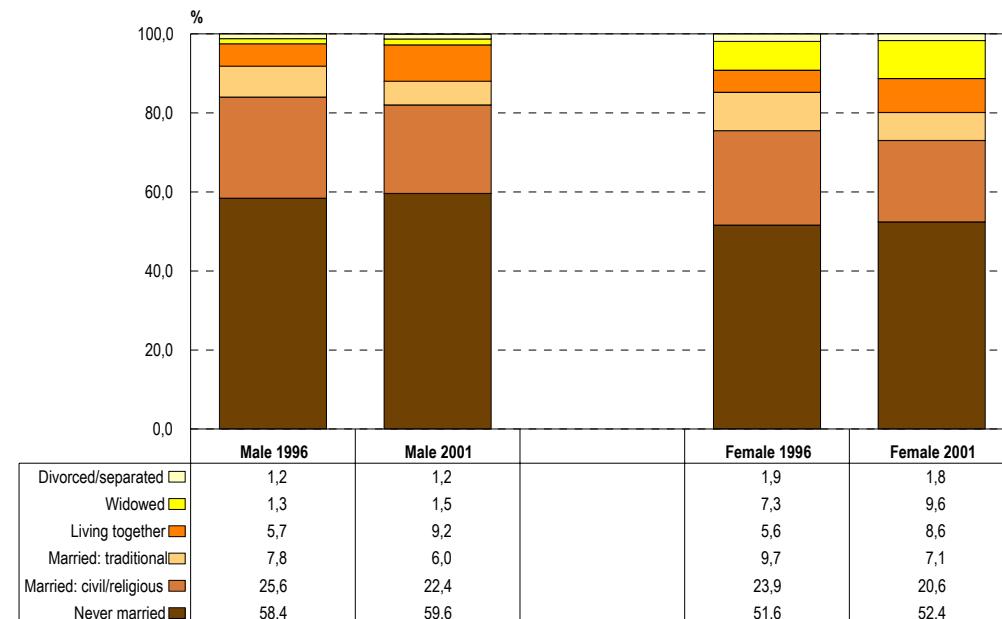

Tables 6.1 to 6.4 show number and percentage comparisons for KwaZulu-Natal between the censuses of 1996 and 2001, for marital status of the population aged 15 years and older, by population group and gender.

Among persons in this age group at the time of Census '96, 2,8 million said they had never been married, compared to 3,4 million at the time of Census 2001.

Figure 6 indicates that in 1996, 9,1% of women had a marital status of divorced, separated or widowed, as opposed to 2,5% of men. At the time of Census 2001, 11,4% of women and 2,7% of men were either divorced, separated or widowed.

Note that although the legal minimum age for marriage is 16, the data given here allow for traditional marriages of 15-year-olds.

**Figure 6**  
Marital status by gender amongst those aged 15 years and older  
Census 1996 and 2001: KwaZulu-Natal

Census 1996: Excluding persons in collective living quarters and unspecified marital status

Census 2001: Excluding polygamous marriages; imputed values for unspecified marital status

## 6.1 Marital status amongst those aged 15 years and older by population group and gender (numbers): KwaZulu-Natal, 1996

Please refer to the extract from the report of the Census Subcommittee to the SA Stats Council on Census 2001 (p.3) when reading this table.

## 7 Disability

Tables 7.1 to 7.4 show the numbers and percentages of disabled people in KwaZulu-Natal from Census '96 and Census 2001, by population group and gender.

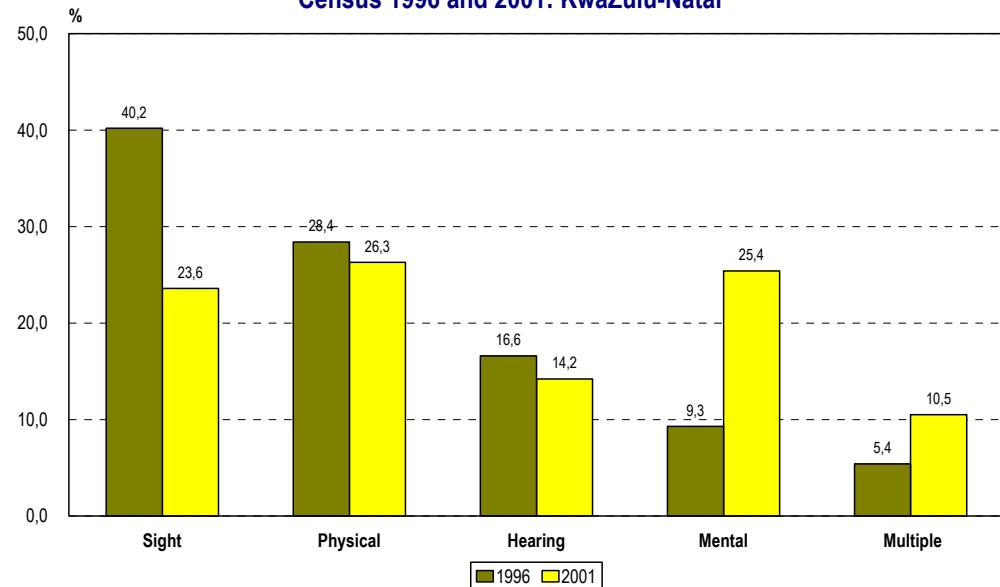

At the time of Census 2001, 471 000 persons (5,0% of the KwaZulu-Natal population) were reported to be disabled. A physical disability was reported for 124 000 persons, followed by a sight disability for 111 000 persons and a hearing disability for 67 000 persons.

Figure 7 shows the percentage of the disabled population with each type of disability, except that persons with more than one disability are only captured in the last category on the graph.

The question on disability was phrased differently in Census 2001 from Census '96, with the emphasis in 2001 on whether the disability prevented the person's full participation in life activities. The questionnaire also contained a short description of what was meant by each category. The different phrasing of the question has an effect on comparisons with Census '96. Disability data from the two censuses are therefore not strictly comparable.

The effects of the difference in wording on reported disability can be seen clearly in the figure.

**Figure 7**  
Percentage of the disabled population with each type of disability  
Census 1996 and 2001: KwaZulu-Natal

Census 1996: Excluding people in collective living quarters and unspecified type of disability

Census 2001: Mental disability includes emotional, intellectual and communication disabilities. Imputed values for unspecified type of disability

Caution: The different phrasing of the questions in the two censuses makes comparisons difficult.

## 8 Level of education

Tables 8.1 to 8.4 show numbers and percentages of people in KwaZulu-Natal who had reached each level of education, from Census '96 and Census 2001, amongst those aged 20 years and older, by population group and gender.

At the time of Census '96, 201 000 people in KwaZulu-Natal reported that they had post-school qualifications. This had increased to 349 000 by Census 2001.

Figure 8 shows that in both census years almost a third of the KwaZulu-Natal population aged 20 years and older had started but had not completed secondary education. Only as few as 4,8% in 1996 and 6,9% in 2001 had reached an educational level higher than Grade 12.

**Figure 8**  
Level of education amongst those aged 20 years and older  
Census 1996 and 2001: KwaZulu-Natal

Census 1996: Excluding unspecified level of education  
Census 2001: Imputed values for unspecified level of education

## 9 Attendance at an educational institution

Tables 9.1 to 9.4 show numbers and percentages of people in KwaZulu-Natal attending an educational institution amongst those aged 5 to 24 years, by population group and gender. The information is given for each single-year age category.

A larger number of young children were attending an educational institution in 2001 than in 1996. In the age category 5 to 13 years, there was an increase of 340 000 schoolchildren in KwaZulu-Natal between 1996 and 2001.

Figure 9 shows comparisons between censuses 1996 and 2001. Up to the age of 14 years there was an increase between 1996 and 2001 in the proportion attending an educational institution, but from age 15 years and older the proportion decreased.

**Figure 9**  
**Percentage of the population aged 5-24 attending an educational institution  
 in single-year age categories**  
**Census 1996 and 2001: KwaZulu-Natal**

Census 1996: Excluding unspecified age

Census 2001: Imputed values for unspecified age

Please refer to the extract from the report of the Census Subcommittee to the SA Stats Council on Census 2001 (p.3) when reading this table.

## 10 The labour market

Tables 10.1 to 10.4 show numbers and percentages for the censuses of 1996 and 2001, of persons aged 15 to 65 years in KwaZulu-Natal, according to their labour market status.

In 1996, there were 4,9 million people in the age category 15 to 65 years in KwaZulu-Natal. Of these, just under 1,6 million were employed, 1,0 million were unemployed and 2,3 million were not economically active. At the time of Census 2001, there were 5,8 million people aged 15 to 65 years. Of these, just over 1,6 million were employed, 1,5 million were unemployed and 2,6 million were not economically active. The latter includes students, homemakers, the disabled, those too ill to work and anyone not seeking work.

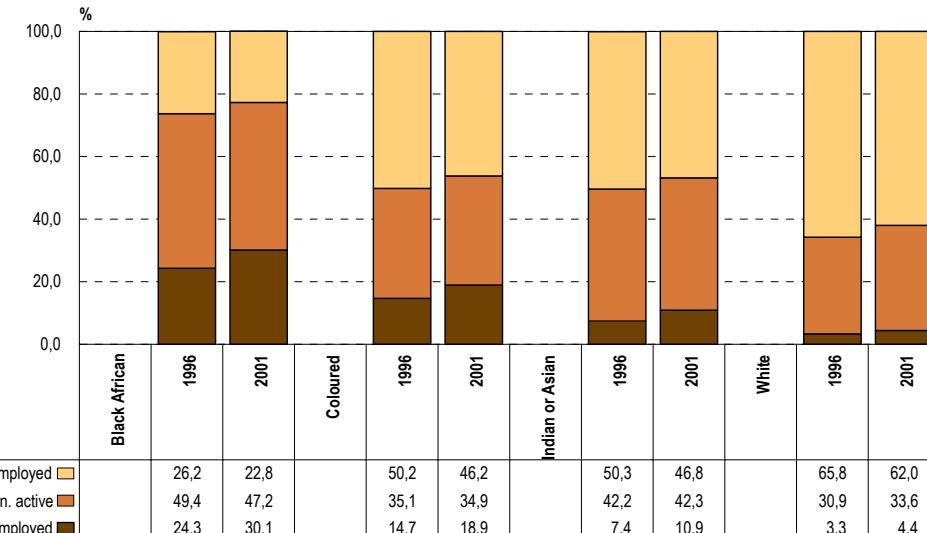

Figure 10 shows comparative data for the two censuses. Of those aged 15–65 in KwaZulu-Natal in both census years, the African and coloured population groups had higher proportions of the unemployed than the other population groups.

It should be noted that Census 2001 most probably underestimated employment (particularly in the informal and subsistence agricultural sector), so these data should be used with caution. For official labour market statistics, the reader is advised to refer to the findings of Stats SA's bi-annual labour force survey, where more probing questions on employment and unemployment are asked.

Moreover the labour market questions were phrased differently in the two censuses. For example, in 1996 no questions were asked on job-seeking behaviour, so the 1996 figures reflect unemployment according to the expanded definition (see the introduction).

The comparisons should therefore be regarded as showing trends rather than actual numbers or percentages.

**Figure 10**  
**Distribution of the population aged 15-65 by labour market status and population group**  
**Census 1996 and 2001: KwaZulu-Natal**

\*1996: equivalent of the expanded definition; 2001: official or strict definition. Comparisons are therefore difficult.

Census 1996: Excluding persons in collective living quarters and unspecified labour market status

Census 2001: Imputed values for unspecified work status

## 11 The not economically active

Tables 11.1 to 11.4 show numbers and percentages of the working-age population of KwaZulu-Natal by labour market status, with additional details regarding the not economically active.

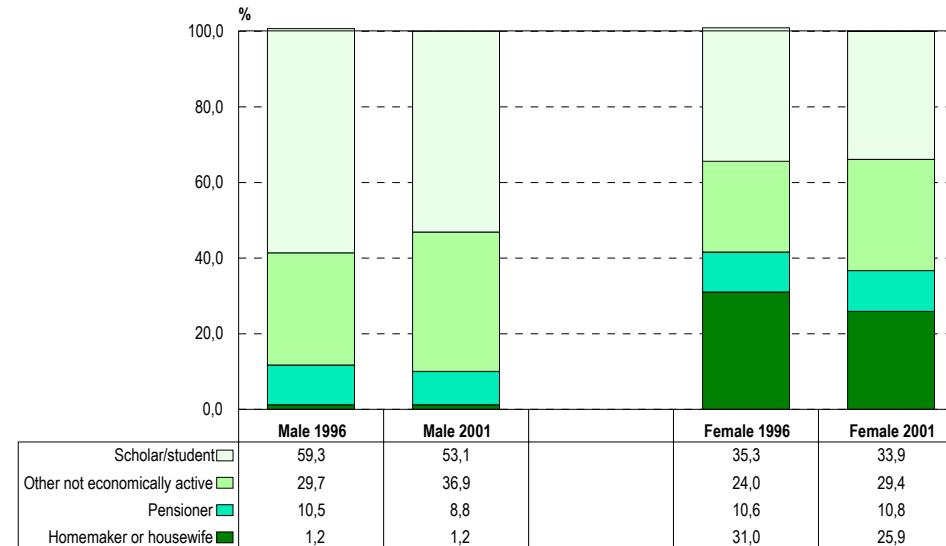

In 1996, among the 2,3 million people in KwaZulu-Natal who were not economically active, 1,0 million were scholars, students or children not studying, 462 000 were full-time homemakers or housewives and 241 000 were pensioners or retired persons. At the time of Census 2001, of the 2,6 million people who were not economically active, 1,1 million were scholars or students\*, 422 000 were full-time homemakers or housewives and 263 000 were pensioners or retired persons.

Figure 11 shows that in 1996, 59,3% of the men and 35,3% of the women who were not in the labour market were students or scholars. At the time of Census 2001 these proportions decreased to 53,1% and 33,9%. Extremely small proportions of men were engaged in full-time housekeeping in both censuses.

Please refer to the cautions in Section 10 above when reading this section.

\* 'Child not scholar' was not an option in 2001 and any such children would have been captured under 'Does not choose to work'.

**Figure 11**  
Reason for being classified as not economically active  
amongst men and women aged 15-65  
Census 1996 and 2001: KwaZulu-Natal

Census 1996: Excluding persons in collective living quarters and unspecified reason for not being economically active

Census 2001: Imputed values for unspecified reason for not being economically active

Caution: The different definitions of unemployment used for 1996 and 2001 also affect these data, so comparisons between the two years are difficult.

\*Official or strict definition

Please refer to the extract from the report of the Census Subcommittee to the SA Stats Council on Census 2001 (p.3) when reading this table.

## 12 Full-time and part-time work

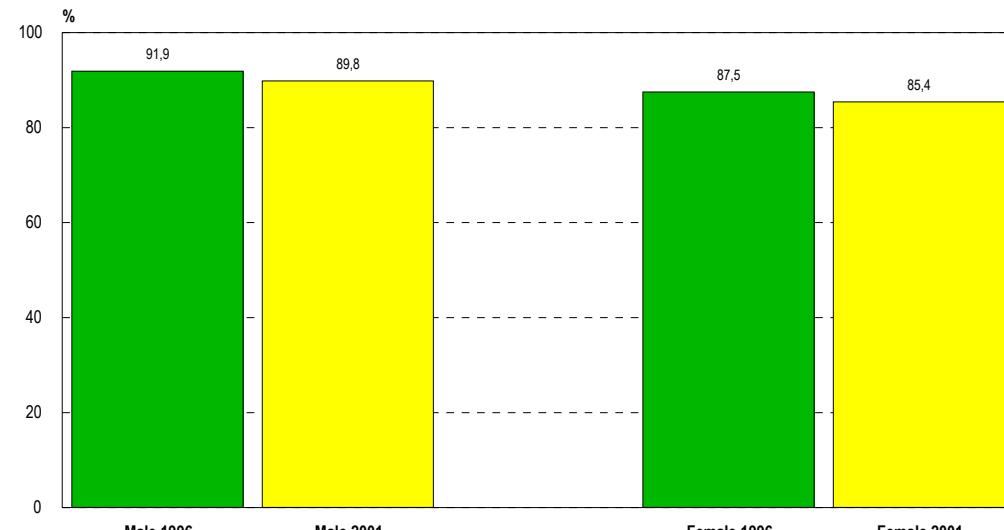

Tables 12.1 to 12.4 describe the economically active population of KwaZulu-Natal, with details of whether the employed were working full-time or part-time.

In 1996, 149 000 people in KwaZulu-Natal were working part-time and 1,4 million were working full-time, while 67 000 workers did not provide this information. In Census 2001, 195 000 people were working part-time and 1,4 million were working full-time.

Figure 12 shows that in 1996, 91,9% of employed men and 87,5% of employed women worked full-time. In Census 2001, on the other hand, 89,8% of employed men and 85,4% of employed women worked full-time. It can be seen that a slightly larger percentage of men than women worked full-time in both census years.

Please refer to the cautions in Section 10 above when reading this section.

**Figure 12**  
**Percentage of employed men and women who were working full-time**  
**Census 1996 and 2001: KwaZulu-Natal**

Census 1996: Excluding people in collective living quarters and unspecified work status

Census 2001: Imputed values for unspecified work status

## 13 Labour market rates

Tables 13.1 and 13.2 show the labour absorption rates, labour participation rates and unemployment rates for KwaZulu-Natal for 1996 and 2001, based on the data shown in the preceding sections.

The labour participation rate is the proportion of the working-age population that is economically active. It is measured as the sum of the employed and the unemployed as a percentage of the total working-age population. The labour absorption rate is the proportion of the working age population that is employed.

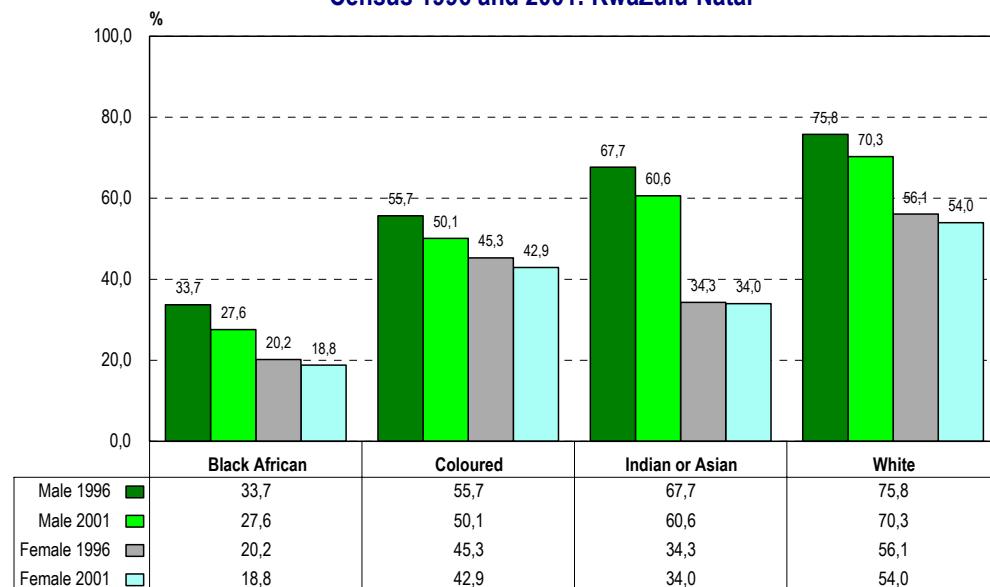

The tables show that in 1996 the labour participation rate was 53,0% (1,6 million employed, 1,0 million unemployed and 2,3 million not economically active). In 2001, the labour participation rate increased to 54,3% (1,6 million employed, 1,5 million unemployed and 2,6 million not economically active).

However the labour absorption rate dropped from 32,2% in 1996 to 27,8% in 2001. There was a corresponding rise in the unemployment rate, from 39,1% in 1996 to 48,7% in 2001.

Figure 13 shows that in both census years the labour absorption rate was highest among white men (75,8% in 1996 and 70,3% in 2001) and lowest among African women (20,2% in 1996 and 18,8% in 2001).

The reader is reminded that the figures for 2001 may underestimate employment. The definitional differences explained in Section 10 above should also be borne in mind.

Please refer to the extract from the report of the Census Subcommittee to the SA Stats Council on Census 2001 (p.3) when reading this table.

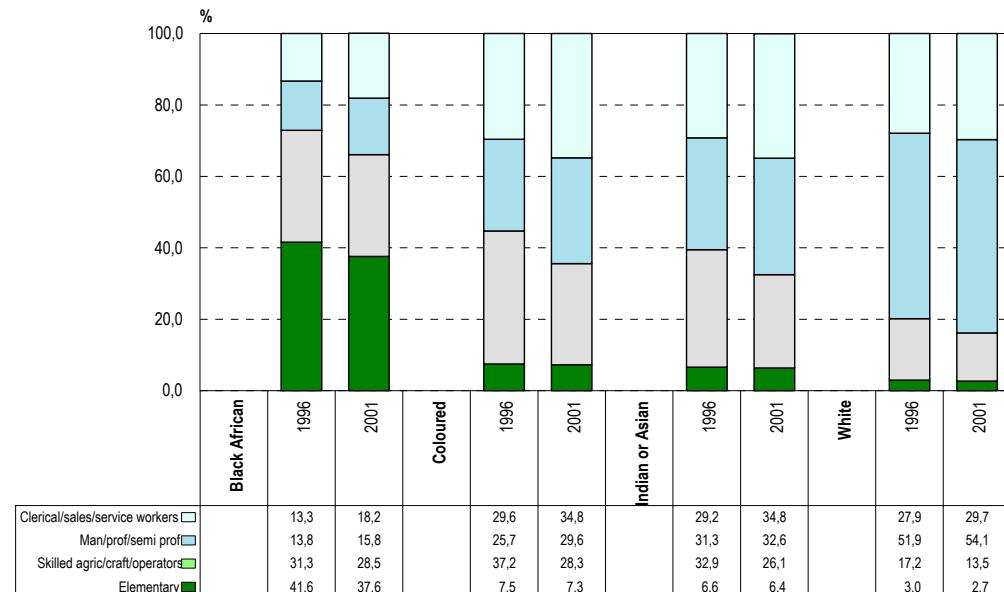

## 14 Occupation of the employed

Tables 14.1 to 14.4 show the numbers and percentages of the employed aged 15 to 65 years in KwaZulu-Natal by occupation, population group and gender, in Census '96 and 2001.

In 1996, 380 000 people were employed in the group comprising skilled agricultural workers, craft workers and plant and machine operators, 377 000 in elementary occupations, and 288 000 in managerial, professional or technical occupations. In 2001, there was a slightly different pattern, with 397 000 in elementary occupations, 385 000 in the group comprising skilled agricultural workers, craft workers and plant and machine operators, and 354 000 in managerial, professional or technical occupations.

Figure 14 shows the distribution of the employed population in both censuses by population group and the four broad occupational categories. At the time of Census 1996, the largest group among African workers (41,6%) was employed in elementary occupations, while only 3% of the white working population fell into this category. The largest group of white workers (51,9%) fell into the managerial, professional and technical group, while only 13,8% of African workers fell into that group. The percentages for 2001 follow a similar pattern.

Please refer to the extract from the report of the Census Subcommittee to the SA Stats Council on Census 2001 (p.3) when reading this table.

## 15 Economic sector of the employed

Tables 15.1 to 15.4 show numbers and percentages of the employed aged 15 to 65 years in KwaZulu-Natal by economic sector, population group and gender, in Census '96 and 2001.

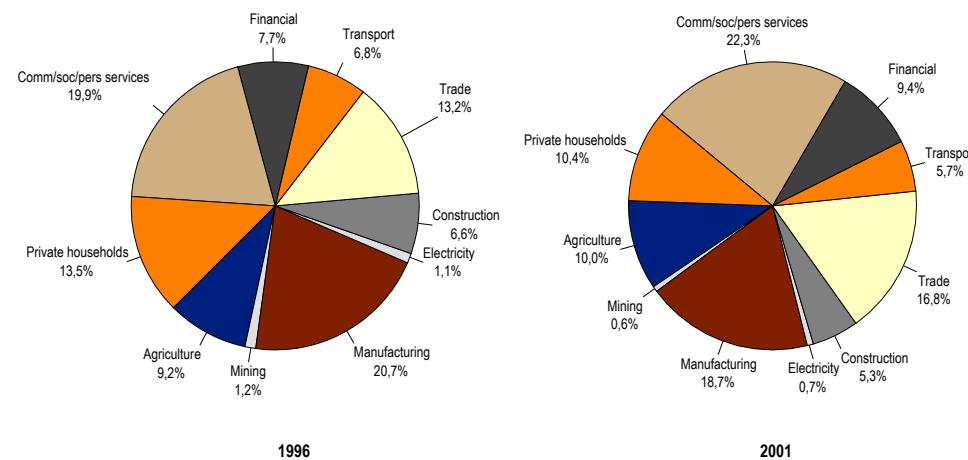

In both censuses, the four main sectors in which the employed population of KwaZulu-Natal worked were community services; manufacturing; private households; and wholesale and retail trade. In 1996, 266 000 were employed in manufacturing, 256 000 in community services, 174 000 in private households and 170 000 in trade. At the time of Census 2001, the numbers working in community services, manufacturing and trade had increased, while the numbers working in private households had decreased.

Figure 15 shows the proportions of the employed working in each economic sector for both census years. Persons working in the four major sectors described above represented over two-thirds of the employed population in both censuses.

Please note: The South African Police Service, Correctional Services and the South African National Defence Force are included with government employees in the community, social and personal services category.

Readers are again referred to the notes in Section 10 above.

**Figure 15**  
**Distribution of the employed aged 15-65 years by economic sector**  
**Census 1996 and 2001: KwaZulu-Natal**

Census 1996: Excluding people in collective living quarters, unspecified industry and industries which could not be classified  
Census 2001: Excluding unspecified industry and industries which could not be classified

Please refer to the extract from the report of the Census Subcommittee to the SA Stats Council on Census 2001 (p.3) when reading this table.

## 16 Income, before tax, of the employed

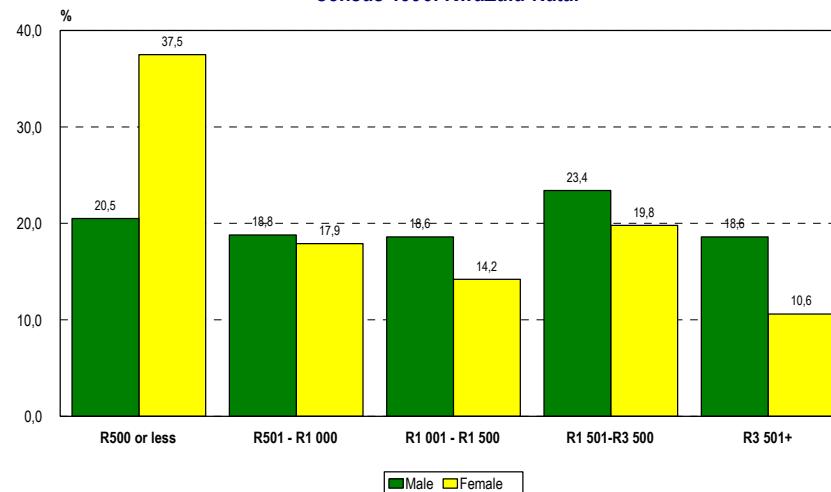

Tables 16.1 to 16.4 show numbers and percentages of the employed in KwaZulu-Natal in the different monthly income brackets in 1996 and 2001.

The monthly income data for 1996 and 2001 are not easily comparable. The income categories used in the two census years are different, the categories have not been adjusted for inflation and the question on additional money from sources other than employment was not included in 2001. The definition of income and the enumerators' instructions stipulated that income was to include all sources, but it is possible that this was overlooked.

In 1996, 696 000 people in KwaZulu-Natal earned an income of R1 000 or less per month before tax, 664 000 earned between R1 001 and R4 500, 129 000 earned between R4 501 and R11 000, and as few as 23 000 earned R11 001 or more.

**Figure 16.1**

**Distribution of the employed aged 15-65 by monthly income  
Census 1996: KwaZulu-Natal**

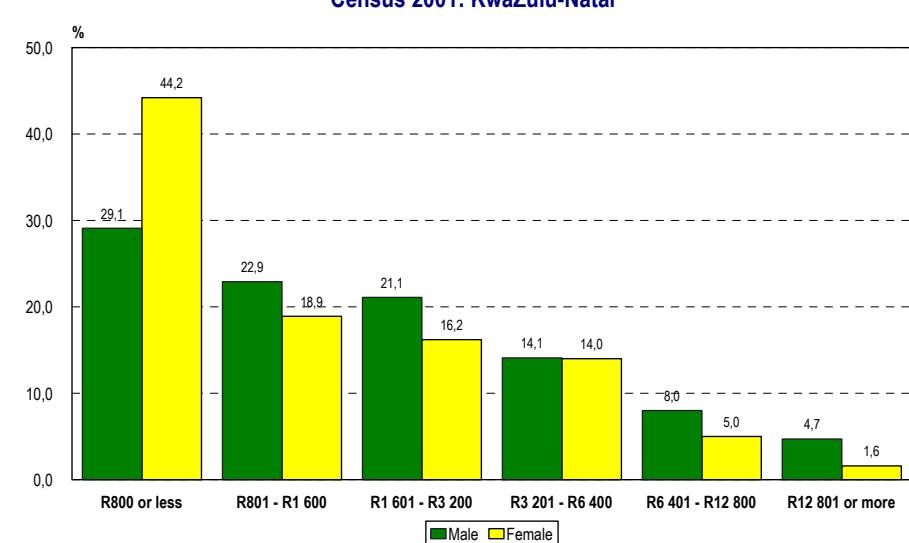

Excluding people in collective living quarters and unspecified income

Census 2001 shows that 573 000 employed people earned an income of R800 or less per month before tax, 642 000 earned an income between R801 and R3 200, only 333 000 earned an income between R3 201 and R12 800, and as few as 54 000 thousand earned R12 801 or more.

Figures 16.1 and 16.2 show clearly that a greater percentage of women fell into the lowest income category in both census years, and greater proportions of men into the upper categories. Moreover the proportions of men and women in the lowest income category were slightly greater than the national pattern for both years.

Please refer to the extract from the report of the Census Subcommittee to the SA Stats Council on Census 2001 (p.3) when reading this table.

## **Part 2: Information on households**

## 17 Type of dwelling

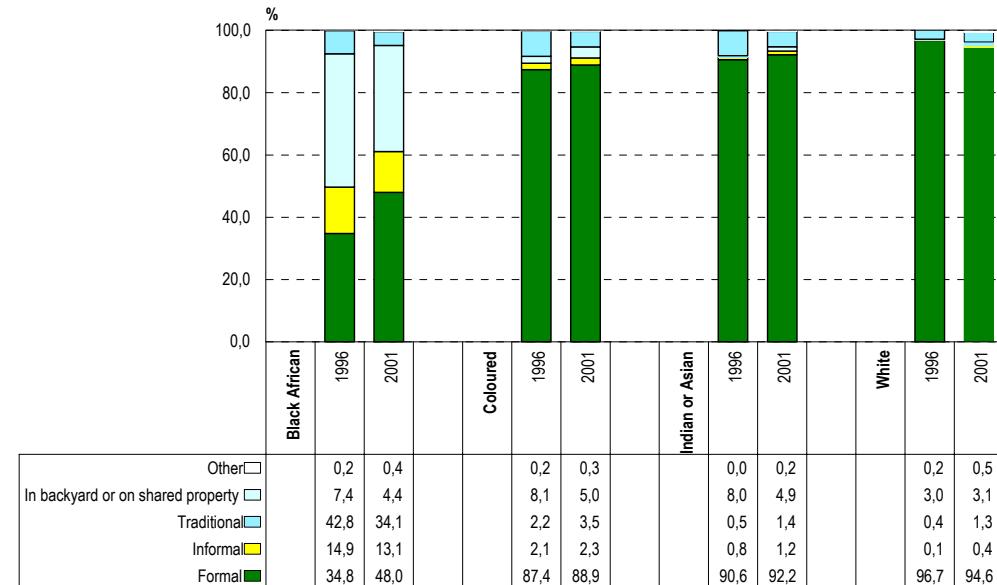

Tables 17.1 to 17.4 show numbers and percentages of KwaZulu-Natal households living in each type of dwelling, by population group and gender of the household head, in 1996 and 2001.

In 1996, of the 1,7 million households living in housing units in KwaZulu-Natal, 806 000 lived in formal housing, while 532 000 lived in traditional dwellings and 186 000 lived in shacks. In 2001, of 2,1 million households, 1,2 million lived in formal housing, while 581 000 lived in traditional dwellings and 226 000 lived in informal housing (shacks).

In Figure 17, it can be seen that the proportion of African-headed households living in formal dwellings increased from 34,8% to 48,0% between 1996 and 2001.

\* Houses on a separate stand or yard, flats and townhouses (and in 1996 units in a retirement village) are grouped here as formal. The other groupings are traditional dwellings; informal dwellings (shacks in backyards or in informal settlements); and other accommodation in a backyard or on a shared property.

**Figure 17**  
**Distribution of households by type of dwelling and population group of the household head**  
**Census 1996 and 2001: KwaZulu-Natal**

## 18 Energy

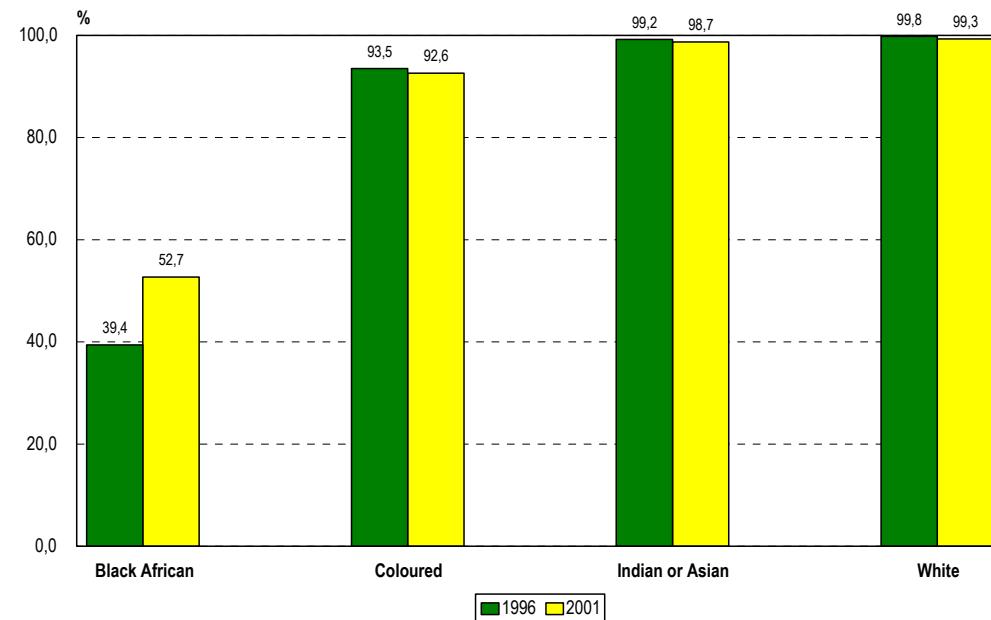

Tables 18.1 to 18.4 show numbers and percentages of KwaZulu-Natal households using each energy source by population group and gender of the household head, in censuses 1996 and 2001.

In 1996, of the 1,2 million households headed by Africans, 487 000 used electricity, 656 000 used candles and 85 000 used paraffin for lighting. In 2001, of 1,7 million households headed by Africans, 889 000 used electricity, 726 000 used candles and 53 000 used paraffin for lighting.

By Census 2001, the overall proportion of households using electricity for lighting had increased from 53,5% to 61,4%. The percentages of people using electricity for cooking and heating had also increased, but by smaller margins.

Figure 18 focuses on energy used for lighting. It indicates that African-headed households using electricity for lighting increased from 39,4% in 1996 to 52,7% in 2001, an increase of 13,3 percentage points. Households headed by the other population groups showed decreases of between 0,5% and 0,9%.

Excluding collective living quarters

Please refer to the extract from the report of the Census Subcommittee to the SA Stats Council on Census 2001 (p.3) when reading this table.

## 19 Water

Tables 19.1 to 19.4 show the main source of water used by KwaZulu-Natal households in 1996 and 2001.

At the time of Census '96, of 1,7 million households only 1,1 million (66,3%) had access to piped water. In 2001, out of 2,1 million households, 1,5 million (73,2%) had access to piped water.

The data for main water source are not strictly comparable as the phrasing of the water questions was different in the two censuses, as well as the order in which the options were presented. However Census 2001 did collect information on the distance from the dwelling to the public tap, where used, which is useful for monitoring the level of service provided.

**Figure 19**  
**Distribution of households by main source of water**  
**and population group of the household head**  
**Census 1996 and 2001: KwaZulu-Natal**

Census 1996: Excluding collective living quarters and unspecified main water source

Census 2001: Excluding collective living quarters. Imputed values for unspecified main water source

## 19.1 Main water supply by population group and gender of the household head (number of households): KwaZulu-Natal, 1996

Excluding collective living quarters

Please refer to the extract from the report of the Census Subcommittee to the SA Stats Council on Census 2001 (p.3) when reading this table.

## 20 Sanitation

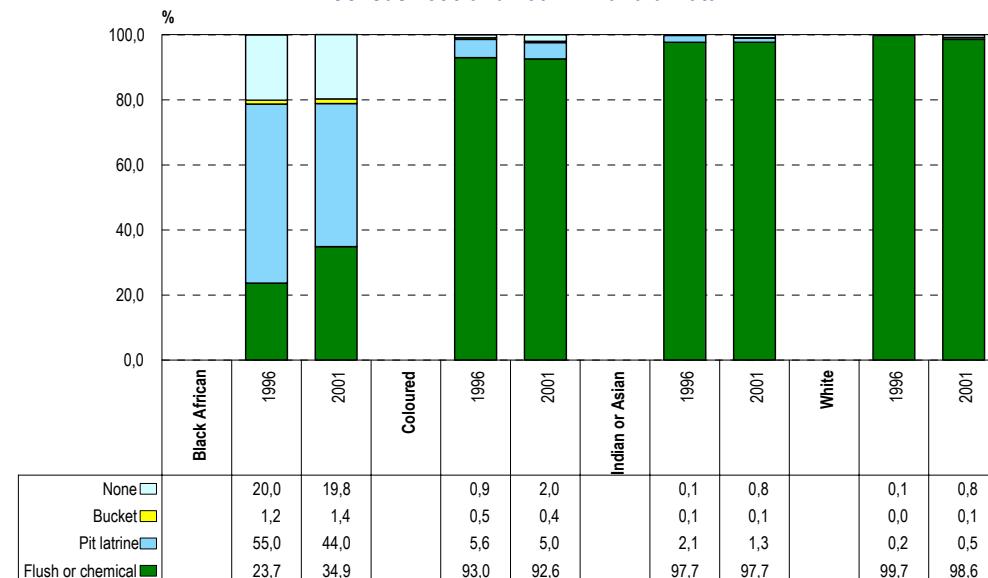

Tables 20.1 to 20.4 show numbers and percentages of KwaZulu-Natal households with the various types of toilet facility, by population group and gender of the household head, in 1996 and 2001.

In 1996, of 1,7 million households, 693 000 used flush or chemical toilets and 691 000 used pit latrines. In 2001, of 2,1 million households, 978 000 used flush or chemical toilets and 747 000 used pit latrines.

It can be seen in Figure 20 that for African-headed households, access to a flush or chemical toilet increased from 23,7% to 34,9% over the five-year period, with a corresponding decrease in the use of a pit latrine.

Census 2001 distinguished between ventilated pit latrines (VIP) and other pit latrines. This distinction is important as a VIP is regarded as meeting minimum health standards. Please note that the categories in the figure do not include this distinction, but details are provided in the tables.

**Figure 20**  
**Distribution of households by type of toilet facility and population group of the household head**  
**Census 1996 and 2001: KwaZulu-Natal**

Census 1996: Excluding collective living quarters and unspecified toilet facility

Census 2001: Excluding collective living quarters. Imputed values for unspecified toilet facility

Excluding collective living quarters

Please refer to the extract from the report of the Census Subcommittee to the SA Stats Council on Census 2001 (p.3) when reading this table.

## 21 Refuse removal

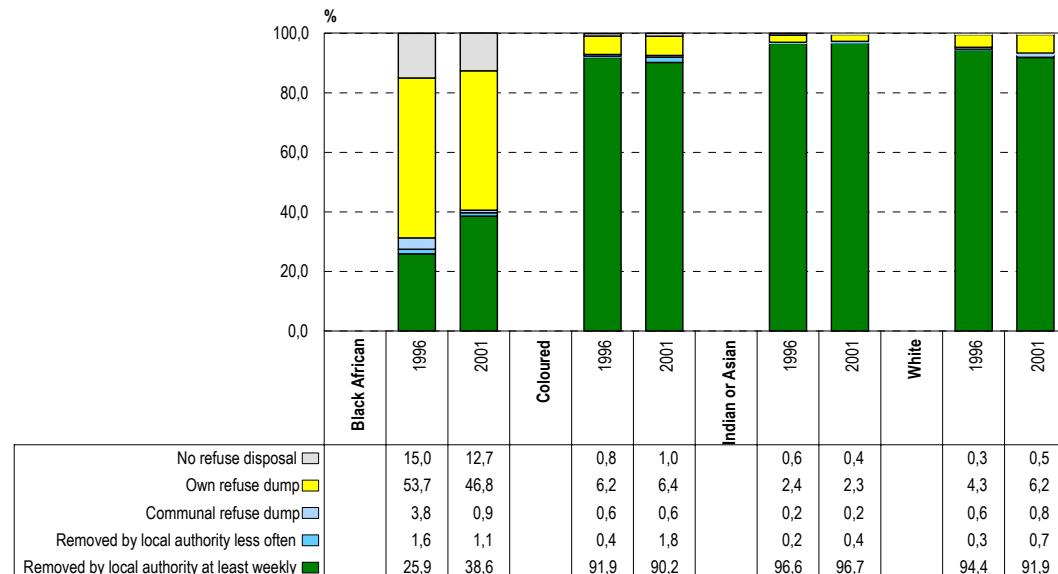

Tables 21.1 to 21.4 show numbers and percentages of KwaZulu-Natal households with each type of refuse removal, by population group and gender of the household head, in the censuses of 1996 and 2001.

At the time of Census '96, of 1,6 million households, 696 000 had a regular refuse removal service, 720 000 households used their own or a communal refuse dump and almost 187 000 had no method of refuse disposal. In 2001, of 2,1 million households, 1,0 million households had a regular refuse removal service, 823 000 households used their own or a communal refuse dump and 216 000 had no method of refuse disposal.

It can be seen in Figure 21 that for African-headed households, the proportion with a refuse removal service at least weekly increased from 25,9% in 1996 to 38,6% in 2001, whilst the proportion of households in all other categories decreased.

For KwaZulu-Natal as a whole, 41,9% of all households had a regular refuse removal service in 1996. At the time of Census 2001, 49,2% of all households in KwaZulu-Natal had such a service.

**Figure 21**  
**Distribution of households by type of refuse removal**  
**and population group of the household head**  
**Census 1996 and 2001: KwaZulu-Natal**

Census 1996: Excluding collective living quarters and unspecified type of refuse removal

Census 2001: Excluding collective living quarters. Imputed values for unspecified type of refuse removal

## 22 Telephones

Tables 22.1 to 22.4 show numbers and percentages of KwaZulu-Natal households with various levels of access to telephone facilities, by population group and gender of the household head, in the censuses of 1996 and 2001.

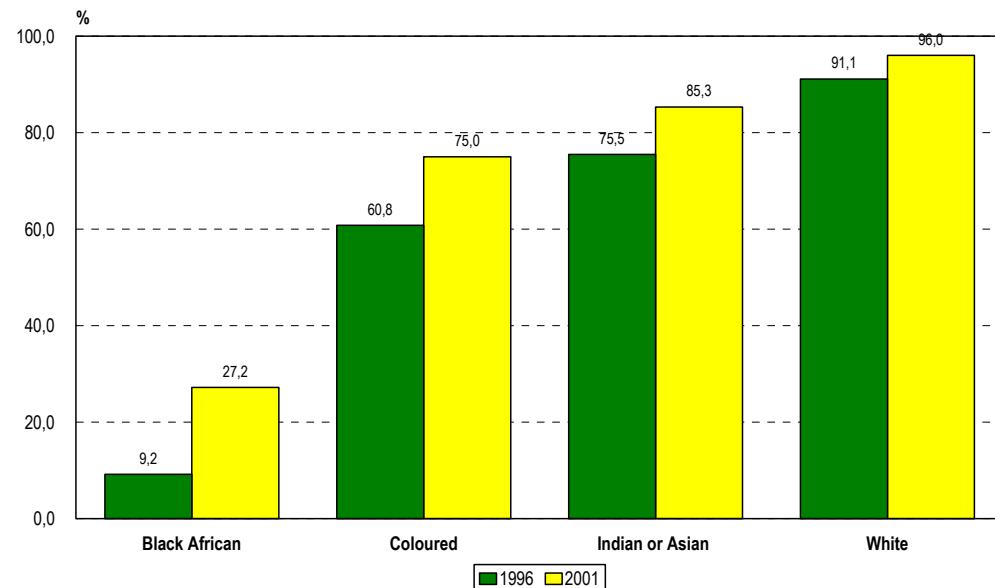

In 1996, of 1,7 million households, 447 000 had a telephone in the dwelling or a cellular telephone, 873 000 had access to a telephone at a neighbour or other location, and 329 000 households had no access to a telephone. At the time of Census 2001, access to a telephone had increased considerably, with 813 000 of the 2,1 million households reporting a telephone in the dwelling or a cellular telephone, and 1,1 million reporting access to a telephone at a neighbour or other location. The number with no access to a telephone had dropped to 174 000.

Figure 22 shows that the proportion of African-headed households with a telephone in the dwelling or a cellular phone increased from 9,2% in 1996 to 27,2% in 2001, with progressively smaller increases for coloured-, Indian/Asian-, and white-headed households.

For KwaZulu-Natal as a whole, in 1996 only 27,0% of all households had a telephone in the dwelling or a cellular phone. By 2001, this had increased to 39,1% of households.

Note that while the 1996 census did not distinguish between landlines and cellular phones, this distinction was captured in 2001.

Excluding collective living quarters

Please refer to the extract from the report of the Census Subcommittee to the SA Stats Council on Census 2001 (p.3) when reading this table.

## 23 Age distribution of household heads

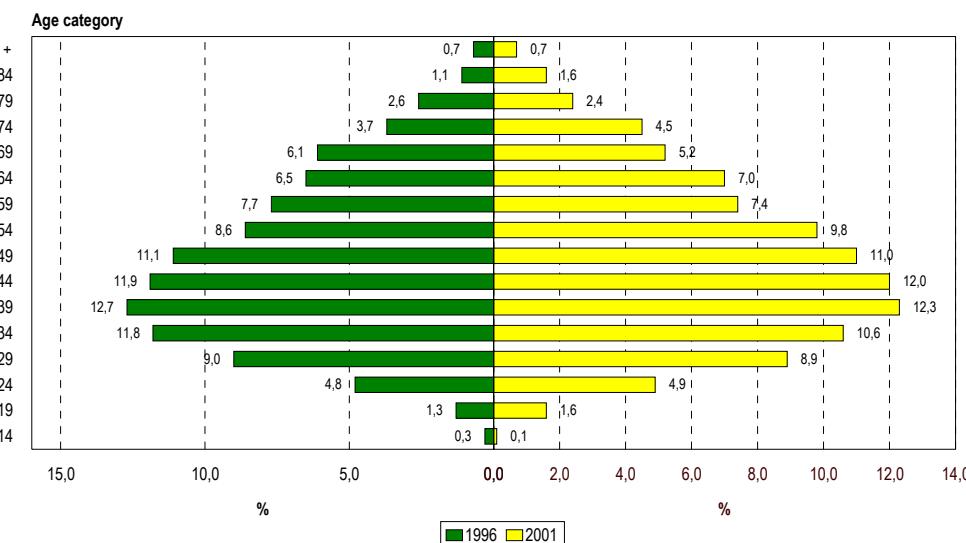

Tables 23.1 to 23.4 show the age distribution of household heads for KwaZulu-Natal in numbers and percentages, by population group and gender, for the censuses of 1996 and 2001.

At the time of Census '96, 919 000 households heads were in the age category 25 to 49 years, 26 000 in the age group 19 years and younger (down to 10 years old), and 29 000 in the age group 80 years and older. In 2001, 1,1 million household heads were in the age category 25 to 49 years, 37 000 were in the age group 10 to 19 years, and 49 000 were in the age group 80 years and older.

Child household heads younger than 10 were also captured in 2001; the numbers and percentages are fractional and have not been included here. However it should be noted that for this reason the total households in the 2001 tables for this variable are slightly lower than the usual totals.

Figure 23 shows that in both censuses more than a third of all the household heads were in the age group 30 to 44 years.
